SafetyCover

SECURITY COVER

The automatic Safety Cover fits most existing and new pools, **guaranteeing safety for the whole family**. In fact, this cover is specially designed to **prevent possible falls into the water** thanks to its **high-strength 600 g/m² sheet** that is laid on the water and run on two side rails.

The Safety Cover **can support the weight of one or more adults without collapsing**. At the touch of a button, the automatic cover unfurls to cover the pool and rolls up, disappearing into the dedicated technical compartment, simultaneously guaranteeing safety and elegant, discreet aesthetics.

The Safety Cover can support the weight of one or more adults without collapsing. At the touch of a button, the automatic cover unrolls to cover the pool and rolls up, disappearing into the dedicated technical compartment, simultaneously guaranteeing safety and elegant, discreet aesthetics.

COVER

Complies with the European (NF P90-308) and US (ASTM F1346-91) safety standard.

4 SEASONS

PERFECT FOR ALL NEW OR EXISTING POOLS

Perfect for all new or existing swimming pools

The automatic 4-season enclosure fits most **existing pools or pools to be built**.

For existing pools, the rails are placed on the floor adjacent to the liner and the motorised roller is placed in a bank at one side of the pool. **For new pools**, the rails are inserted into the liner rail profile while the motorised roller is housed in a special compartment. All systems are designed and manufactured to achieve a **reliable, quality enclosure structure while putting your safety and that of your family first**.

6 REASONS TO CHOOSE SAFETY COVER

6 reasons to choose Safety Cover

SAFETY AND SECURITY

Easy to open and close cover, complies with European (NF P90-308) and US (ASTM F1346-91) safety standard.

ENERGY AND ECONOMIC SAVINGS

- Prevents water evaporation
- Maintains temperature for a long time
- Longer pool liner life

POOL CLEAN AND READY FOR USE

The hermetic closure blocks the entry of dust, leaves and insects and prevents the formation of algae and microorganisms.

INSULATION

The use of reinforced PVC sheeting increases insulation by 25% compared to traditional sheeting.

STRONG AND DURABLE

Tested, durable and long-lasting components. Minimum maintenance.

VERSATILE

It is installed on pools of all shapes, curved or square, new or existing.

SAFETY AND PROTECTION: Easy to open and close cover, complying with European (NF P90-308) and US (ASTM F1346- 91) safety standards. **ENERGY AND ECONOMIC SAVING:** Avoids water evaporation; Maintains temperature for a long time; Extended pool liner life. **POOL CLEAN AND READY TO USE:** Thanks to the hermetic closure that blocks the entry of dust, leaves and insects and prevents the formation of algae and micro-organisms. **INSULATION:** the use of reinforced PVC sheeting increases insulation by 25% compared to traditional sheeting. **RESISTANT AND DURABLE:** tested, durable and long-lasting components. Minimum maintenance. **ADAPTABLE:** it can be installed on pools of any shape, curved or square, new or existing.

CONFIGURATION OF THREE TYPES

Configuration of three types

Safety Cover guides adapt to any pool. Whether overflow or skimmer, there are guides specially designed for each situation, allowing you to install an essential element for the movement of the enclosure without it being visible when the latter is not in use.

FOR EXISTING POOLS AND UNDER CONSTRUCTION

FOR POOLS UNDER CONSTRUCTION

FOR POOLS UNDER CONSTRUCTION

CONFIGURATION AT

No masonry work is required either for the mechanics housed outside the pool or for the installation of the rails. Suitable for any type of pool from rectangular to freeform. Configurable for skimmer and overflow pools.

CONFIGURATION A: No masonry work is required either for the mechanics housed outside the pool or for the installation of the rails. Suitable for any type of pool from rectangular to freeform. Configurable for skimmer and overflow pools.

CONFIGURATION B

Mechanics concealed in dedicated dry technical compartment. Possibility of installing the rails flush with the floor for an aesthetic design result. Suitable for every type of pool from rectangular to freeform. Configurable for skimmer and overflow pools.

CONFIGURATION B: Mechanics concealed in dedicated dry technical compartment. Possibility of installing tracks flush with the floor for an aesthetically pleasing design result. Suitable for every type of pool from rectangular to freeform. Configurable for skimmer and overflow pools.

CONFIGURATION C

Suitable for rectangular pools under construction or renovation. Mechanics concealed in a dedicated dry technical compartment, rails hidden underneath for refined elegance. Configurable for skimmer or cascade overflow pools.

CONFIGURATION C: Suitable for rectangular pools under construction or renovation. Mechanics concealed in a dedicated dry technical compartment, rails hidden underneath for refined elegance. Configurable for skimmer or cascade overflow pools.

SAFETY COVER GUARANTEES

Safety cover guarantees

ONE COVER FOR 4 SEASONS

With Safety Cover your pool is protected all year round, as it acts as an isothermal summer and spring cover, the pool water does not evaporate and rainwater does not enter the pool, so the water does not get cold. In winter and autumn, if the pool is covered with Safety Cover, nothing leaks out, so no winter cover is needed and you are guaranteed to always have your pool ready for use, even the first time you use it!

With Safety Cover your pool is protected all year round, as it acts as an isothermal summer and spring cover, the pool water does not evaporate and rainwater does not enter the pool, so the water does not get cold. In winter and autumn, if the pool is covered with Safety Cover, nothing leaks out, so no winter cover is needed and you are guaranteed to always have your pool ready for use, even the first time you use it!

100% SECURITY

The objective of Safety Cover is to guarantee incomparable safety and protection for you and to your family. The cover, with its high-strength reinforced PVC sheet, provides protection from falls or entrapment, especially for children and pets that can safely walk on the cover (up to a weight of one or more adults without collapsing).

The cover, with its high-strength reinforced PVC sheet, provides protection from falls or entrapment, especially for children and pets, who can safely walk on the cover (up to the weight of one or more adults without collapsing).

PRESERVE S AND PROTECTS

Nothing can pollute the pool water. What settles on top of the cover such as dirt, insects or debris can easily be collected or poured into the cover compartment that is separate from the pool. Safety Cover is resistant to hail, is waterproof and is easily cleaned with suitable descaling and degreasing agents. In this way the life of the pool is extended without incurring frequent maintenance costs!
